ADITYA SUDAM KUMBHAR

adityakumbhar038@gmail.com | 8830193158 | Pune, India | LinkedIn | GitHub: Aditya1kumbhar

Professional Summary

Full-stack developer and third-year B.Sc. Computer Applications student at Sarhad College, Pune. I work mainly with Next.js, React.js, Node.js and PostgreSQL, and I build my own products end to end: VitalGuard C3, a wearable for elderly care; SevaCare, an offline-first care management app piloted at a local old age home; and ORCA (Tarang), a live ocean data app. Runner-up at Smart India Hackathon 2025 (college level). Open to internships in Pune.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, C, C++, HTML5, CSS3

Frameworks / Libraries: Next.js, React.js, Node.js, Prisma ORM, Dexie.js (IndexedDB), REST APIs

Database: PostgreSQL, Supabase (Row-Level Security, Realtime)

Tools & Platforms: Git, GitHub, Vercel, Render, Railway

Projects

VitalGuard C3 | Screenless Edge AI Wrist Band for Elderly Care *2026 - Present*

vitalguard-c3.vercel.app | github.com/Aditya1kumbhar/vitalguard-c3

- Building a screenless wrist band that detects falls and tracks heart rate and SpO2 for elderly users, using an ESP32-C3 board with MAX30102 and MPU6050 sensors.
- Designed the fall detection logic in stages: free fall, then impact, then stillness, with a buzzer and LED alert on the band. All processing happens on the device itself, there is no cloud backend.
- Built the web dashboard used to demonstrate the band's readings and alerts. This is my college final-year project and my entry to the electronica India Tech Challenge 2026.

SevaCare | Offline-First Elderly Care Management PWA *2025*

seva-care-db.vercel.app | github.com/Aditya1kumbhar/SevaCare

- Built a progressive web app for digitizing elderly care records, using React.js, Node.js and Supabase (PostgreSQL) with Row-Level Security for access control.
- Piloted the app at a local old age home, where it replaced paper registers for 16-17 residents: medication schedules, exercise logs, nutrition and vitals, with real-time tracking.
- Made it offline-first with Dexie.js (IndexedDB), so staff can record data in low-connectivity areas and it syncs to Supabase once the network is back.

ORCA (Tarang) | Ocean Data and Safety App *2026*

tarang-0v0t.onrender.com | github.com/Aditya1kumbhar/Tarang

- Built a web app (FastAPI backend, React frontend, on Render) that pulls live weather, wave and satellite ocean data for 12 harbours on the Indian coast and answers safety questions for fishers. Every answer is labelled live data or fallback data, so estimated values are never shown as real readings.
- Hardened the live deployment (Google sign-in across the API, strict CORS, full security headers). Local test suite: 80 tests, all passing.

RateIT | Verified Local Review Platform *Jun 2025 - Aug 2025*

rateit-platform.vercel.app | github.com/Aditya1kumbhar/rateit-platform

- Built in 6 weeks as a hackathon project: a review platform for local places around Pune (PGs, cafes, coaching classes) where a review needs a GPS check-in, which makes fake reviews harder to post.
- Frontend has 13 app routes, including discover, category and item pages and an Instagram-style photo review feed.
- Backend: Next.js API routes (5 groups), a Prisma and PostgreSQL schema of 8 data models, Supabase Auth, and fraud, geofence and trust-score checks on every review before it is saved.

Research & Publications

Analyzing the Journey of Gukesh Dommaraju in Chess *Feb 2025*

Author & Presenter | BRICS World of Traditions International Conference, Moscow, Russia (Presented via Sarhad College)

- Wrote a solo research paper tracing Gukesh Dommaraju's development from childhood to World Chess Champion, and presented it to the conference's academic review panel.

Certifications & Achievements

- Placed 2nd (Runner-Up), Smart India Hackathon (SIH) 2025, college level.
- Round 1 cleared, Indradhanu Hackathon 2026, as part of Team RISE-A2S1.
- Selected Representative, Avishkar Innovation Competition (based on the RateIT project).
- Google Build with AI Workshop participant (hands-on with Google Gemini APIs and AI development tools).
- Student Representative, Technical Club Committee, Sarhad College, Pune.

Education

B.Sc. Computer Applications Expected 2028

Sarhad College of Arts, Commerce & Science (SPPU University), Pune

Current CGPA: 8.62/10 (up to Semester 4)

Higher Secondary Certificate (12th, PCM) 2023

PVG's Muktangan Jr. College, Pune

Secondary School Certificate (10th) 2021

PVG's Muktangan English School, Pune

Languages

English (Professional Working Proficiency) | Hindi (Native) | Marathi (Native) | German (A1, Learning)
